Health on the Island of Vitality
PRESERVED NATURAL ENVIRONMENT IS A UNIQUE FEATURE OF OUR ISLAND;
clean sea and air, mild climate, vegetative cover and aromatic scents with rest and relaxation will have a beneficial effect on you and will make you healthier and happier. In addition to the therapeutic factors, Lošinj offers numerous year-round programs in nature and in specialized institutions that will help you restore and maintain your impaired vitality.

The island’s climate is defined by its position in the middle of the northern hemisphere. The island’s favorable weather conditions were identified as early as the late 19th century by renowned Viennese medical experts, and were confirmed by long-term expert meteorological observations and research conducted by Dr. Conrad Clar and Prof. Ambroz Haraliti.

This is why Mali Lošinj and Veli Lošinj were proclaimed climate resorts and rehabilitation centers in 1892 under the national law of the Austrian government in Vienna. It is due to these facts that the island is now a well-known climate resort across the world.

We invite you to discover the benefits of our island and provide your family with a healthy and active holiday.

Welcome to Lošinj, the Island of Vitality!
ANNUAL VARIATION OF THE FEELING OF PLEASURE

Did you know people felt very good on Lošinj because of the prevailing annual feeling of pleasure from chilly to warm and hot? The feeling of "very hot" never appears, and "very cold" is very rare. In summer months when the feeling of pleasant and warm prevails, you can stay outdoors all day. The feeling of heat in the afternoon hours of July and August will be mitigated by a refreshing swim in the sea or a stroll in the shade and cool of the pine trees. The abundant Lošinj vegetation will also protect you from the harsh and cold winter bora, occasionally causing a feeling of greater cold in January and February. March, April, May and October are the best months for active holidays with hiking and sports.

CLIMATE AND BIO-CLIMATE

The latest research confirms the benefits of Lošinj's moderately warm and rainy climate that have been detected a long time ago. As it happens, under the direct impact of the sea, temperatures vary very little from the average one, the lowest (7.7°C) in February to the highest (23.8°C) in July, which suits everyone. Daily temperature oscillations are also moderate, which contributes to a feeling of pleasure and reduces stress to the organism.
FEEL...

BEST AIR QUALITY

The results measured by the Public Health Institute in 2007 and 2008 show that the area of Lošinj has a Category 1 air quality. Draw deep breaths and use the natural outdoor aromatherapy, while the essential oils of the pine and marine aerosol purify your lungs.

THE CLEANEST SEA

The sea is of a high quality on the Island of Lošinj thanks to its transparency and absence of harmful substances. The temperature ranges from 11.8°C in February to a maximum of 23.8°C in August. It is suitable for swimming from June to mid-October when its average temperature is 20°C. As such, it has a beneficial effect on the human organism, relaxes and calms.

In Lošinj you can swim along the entire shoreline and the Veli žal, Punta and Poljana beaches fly the Blue Flag. As an international environmental protection award, the Blue Flag proves the high quality of our sea and the fact that we know how to manage our environment, invest in environmental education and ensure our residents’ and guests’ safety.

Our sea is the most beautiful invitation we present to you!

Table: Sun insolation (SI, hours per month), duration of the day (D, hours for the 15th day of the month), and number of sunny days (SI/D in days).

* Source: The Croatian Meteorological and Hydrological Service, DHMZ

ANNUAL WIND ROSE

Weak winds prevail in the annual wind rose. Mistral, the northwest summer wind, will provide you with refreshment on hot summer days, while sailors and windsurfers will look forward to it out on the sea.

ALGAE

262 species of benthic algae have been registered in the sea around the Island of Lošinj. Many of them may have beneficial effects on human health thanks to their valuable ingredients and various methods of use.

OVER 1,200 PLANT SPECIES

The mild Mediterranean climate has made the Island of Lošinj famous for its abundant vegetation and public gardens, on which its tourist flourishing is based. Diverse Mediterranean plants with their essential scents, colors and shapes have a beneficial effect on human health and protects against solar radiation and cold winds.

According to research, there are over 1200 plant species on the island, 939 of them belonging to the autochthonous flora. As many as 230 species are classified as herbs. Famous Lošinj captains and seamen brought around 80 species from their journeys, most of them exotic plants, and planted them in the gardens around their houses. Agave, Mexican cactus (opuntia), palm trees, magnolia, myrtle, pistachio, mimosa, Indian fig (karmus-nassarah), lemon, orange and tangerine, fig, oleander, carob, rosemary, eucalyptus, sequoia, tamaris and other plants grow here. Landmarks include the protected park forests of Čikat and Pod Javori, containing the full abundance of Lošinj’s vegetation. Lošinj is abundant in rich and diverse vegetation throughout the year. In May, when most plants are in bloom, the scenery is heavenly and the whole island just blossoms.

OVER 200 SUNNY DAYS PER YEAR

The large number of average daily and annual sunny hours attracts numerous tourists to our island because the strictly dosed solar radiation, infrared and ultraviolet rays have a favorable effect on children’s growth and development, as well as recovery and recreation of adults.

We recommend you use body milk or oil with a protective factor. There are 207 sunny days per year. The least number of sunny days occurs from November to February, especially in December with only about 11 sunny days. The number of sunny days constantly increases from March onwards. During the sunniest part of the year, from May to September, there are at least 20 sunny days. They mostly occur in July and August with as much as 24 days.

WALKING TRAILS AND FOOTPATHS – A scented experience across five islands

Walking and hiking across the Lošinj archipelago that stretches over five islands and with over 250 kilometres of walking paths is possible throughout the year. The trails cover areas of the islands of Cres (Punta Križa), Lošinj, Ilovik, Susak, and Unije. They vary from simple paths for people who are not in great physical shape, over mid-level difficulty paths to very difficult. The Osoršćica mountain (Nerezine) and St. John’s hill (Sveti Ivan, Veli Lošinj) are very attractive for anyone who loves hiking. The walking trails stretch along the coast and they are ideal for long walks and relaxation.

Get on the move and discover the secrets that are hidden on our archipelago! Let the interests and beauties stowed away jealously on each island become a part of your unique experience!

FOOTPATH OF VITALITY MALI LOŠINJ – VELI LOŠINJ

Along the three kilometres of the Mali Lošinj – Veli Lošinj footpath that stretches along the coast, hidden in a hundred-year-old pine forest, educational panels have been put up that provide the hikers with information on the importance of proper posture and breathing, as well as help them become aware of their movements and processes during their walks. The panels are on permanent display and thanks to them, the the walkers can maximise the benefits of nature.

There are about 10 000 steps in both ways, recommended to be taken every day according to the World Health Organisation standards.

Active walkers can do both directions in 45 minutes, while recreational and slower walkers will need about an hour and a half. The guests can walk along the footpath on their own but there are also guided walks with instructors from the PBS Studio at the Vitality Hotel Punta.

SPORTS-FRIENDLY ALL YEAR ROUND

The heavenly climate provides year-round sporting options. Professional athletes find a shelter here on cold winter days, while recreationists and amateurs find one throughout the year. Sporting options are very diverse, including underwater sports (diving and underwater fishing) and water sports (sailing, windsurfing, skiing, sport fishing, water polo).

If you prefer onshore sports, you will be satisfied to find tennis, basketball, soccer, beach volley, bowling, boccie and fitness centers. You can rent a bike, moped or a boat, all toward a healthy and active holiday!
THE IMPACT OF MICRO-CLIMATE AND NATURAL AEROSOL ON THE ISLAND OF LOŠINJ ON LUNG FUNCTION

The aim of our study was to examine the possible impact of the island’s climate and endemic aerosol on the lung function of vacationers spending time on the island nowadays. A random population study comprised registered auto-camp “Čikat” vacationers in Mali Lošinj. We used spirometry to measure lung function parameters at subjects’ arrival and departure time. The control measurement at departure was on average 11 days apart.

The study comprises 93 cases with verified control measurements. RESULTS: FVC and FEV1 were significantly improved between the two measurements. This improvement was noted in the subgroup with the initial FVC of <100% predicted although these subjects did not use any relevant therapy and/or undertook any other behavioural changes in order to improve their lung function. The improvements in lung function parameters was not significantly associated with age, sex, height and weight, the smoking habits of study subjects, or the time between measurements.

Results of the research lead to the conclusion that Lošinj could be useful to persons with a respiratory disorder, who could, by planning their vacation on the island outside the summer season, and especially in autumn and spring months, prolong their status of remission. The sojourn in Lošinj could lead to long-term remission by improving expectoration and reducing cough, alleviated breathing due to staying in immaculately clean air, favourable temperature and humidity, as well as rich in beneficial aerosol.

Natural treatment and recovery could help in the better control of chronic lung diseases, reduce the consumption of medication and its side effects, prolong remissions and reduce acute inflammatory disease complications in winter.

Anamarija Margan Šulc, Mr.Sc
AROMATHERAPY

NATURAL COSMETICS LINE OF LOŠINJ

APOXYOMENOS LINE
(Greek for Apoksiomen) is made up of three products:

- **LIP BALM**
  For everyday lip care we offer our lip balm that makes your lips shine and whose ingredients provide protection and nourishment.

- **BODY OIL – 50 ml**
  The oil is intended for everyday body care. It is highly recommended for use after physical activity due to laurel essential oil that has a beneficial effect on the lymph and analgesic effect on muscles.

- **SCRUB SOAP – Stringiling**
  With its two active ingredients, olive oil and sea sand, this soap provides a mild peeling for your body, while laurel essential oil encourages cleanse of the lymph.

- **SCENTED ISLAND**
  A blend of essential oils for scented animations in your home that can also be used with massage base oils.

The aim of our natural aroma-cosmetics is to reach out to our clients and help them understand the values of natural resources of the island of Lošinj. Our natural products will be hard to resist.

Amazed by organic material found in the interior of the statue, we have decided to create the Apoxyomenos line.

„MIRTA“ NATURAL COSMETICS
Discover the gentle side of Lošinj
„Mirta“ natural cosmetics is a product line based on the medicinal herbs and essential oils characteristic to the archipelago of Cres and Lošinj. We use only 100% natural ingredients from the best essential oils in our products. Their composition is very similar to the skin which makes the integration much easier.

By using the products from this line you are doing good for your skin which will then breathe better, have a healthier and a more beautiful look, and long after the application, it will exude the intoxicating scents of this peculiar archipelago!
LAUREL-ORANGE NATURAL SOAP
For your scented pleasure in the shower...
Dr. Nina Bašić-Marković, MD recommendation:
“Everyday use of the natural soap is your way back to nature, and at the same time it provides a simple alternative for people with sensitive skin as well as all those who wish to avoid the unwanted irritants. This natural soap nourishes, regenerates, and moisturizes your skin, blocks early-aging signs, and helps with different skin problems.”
In contact with water it turns into rich creamy lather with an irresistible scent. Dried ground laurel boosts the mechanical removal of dead cells and impurities. Combined with sweet orange essential oil, it has an antiseptic and antibacterial effect, stimulates blood circulation and lymph flow, prevents fluid retention, and reduces swelling. Laurel and sweet orange are an exceptional blend that helps recover from illness, reduces chronic fatigue, and lethargy. Sweet orange essential oil is suitable for treating rough, irritated, and tired skin prone to flaking and acne. Your smooth skin will thank you and your mind will be playful and ready for new challenges, because remember, laurel is the symbol of victory!
Use: the soap is used on daily basis for showering and hand washing. For best results, combine it with LAUREL-ORANGE BODY SCRUB.
LAUREL-ORANGE BODY SCRUB
The power of natural ingredients for a glowing skin...
How do you restore glow in your skin and eliminate fatigue in a hasty lifestyle packed with stress? With a scrub - a very simple way that doesn’t require too much time and has an effect on the whole body! Sea salt and dried ground laurel remove dead cells and other impurities, and accumulated toxins. At the same time, they stimulate better blood circulation, reduce fluid retention, relax the spirit, and bring back the enthusiasm. Since the ancient times, olive oil has traditionally been used for a beautiful and glowing complexion. It is naturally rich in antioxidants and vitamin E, so it nourishes your skin, encourages regeneration, and restores its elasticity. Laurel essential oil stimulates blood circulation and lymph flow so it is a very common ingredient in products that are used for sore muscles, arthritis, and cold and swollen feet. As active ingredients of this product, they will boost body detox by stimulating liver and kidney functions. Orange essential oil has a similar effect on the body – it encourages lymph flow, reduces swelling, and it is also useful in fighting cellulite. The warm scent of sweet orange dispels negative thoughts and pessimism, it is beneficial for people suffering from lack of energy or depression. Gently, it will bring back the warmth of the sun to your spirit.
Use: apply scrub to wet skin, and then rub it in gentle, circular motions from your feet towards your heart. Rinse. Use it once a week. For anti-cellulite effect, use it with LAUREL-ORANGE NATURAL SOAP.
Dr. Nina Bašić-Marković, MD recommendation:
“By using this product after a hard day you will do wonders for your skin and restore its brilliance, and at the same time remove the armour of fatigue and stress, and clear your mind.”
EUCALYPTUS DEODORANT
All the power of nature in the safest, most gentle formulas...
Perspiration is our body’s natural cooling mechanism, but it also removes toxins from the body, reduces stress levels, and improves mood. The sweat itself is odour-free, however, when in contact with bacteria on the skin, the proteins and fatty acids create an unpleasant odour. Lemon eucalyptus essential oil acts as a deodorant, prevents odour caused by bacteria growth, while at the same time it does not interfere with natural perspiration mechanism. The cent of lemon eucalyptus is refreshing, invigorating, it reduces fatigue and brings in freshness in your daily life. Shea butter stimulates capillary circulation and oxygen supply of the tissue, at the same time enhances removal of toxins from the body and stimulates perspiration effect. It also prevents allergic reactions and irritations, especially after armpit waxing. Cocoa butter in this deodorant smoothes the skin, brings back its elasticity, and gives it a velvety feeling. Its antibacterial and detoxifying effect should not be forgotten either.
Use: to be used daily, as necessary. Apply to clean, dry skin of the armpit.
Dr. Nina Bašić-Marković, MD recommendation:
“When choosing a deodorant, apart from the scent, practicality, and efficiency, we need to think about our health too! By using this product you will profit from a totally natural protection from odours and maintain all natural body functions.”

LOŠINJ’S NATURAL COSMETICS

The line of Lošinj’s natural cosmetics are made from multiple award-winning extra virgin olive oil, ecological essential oils and unrefined sea salt.

Plant material used in the production of essential oils originates from the islands in the Cres-Lošinj archipelago, one of the most favourable areas for growing aromatic herbs.

The line of Lošinj’s natural cosmetics comprises:

LOŠINJ POMADE
– leaves your skin silky smooth, soft, shiny and rejuvenated after only two or three applications. It is an excellent remedy for dry skin, especially dry areas on hands, elbows and feet.

LOŠINJ BATH SALT
– for tired feet and whole body relaxation. It awakens a feeling of comfort and makes life juices flow.

LOŠINJ BODY SCRUB
– removes all impurities and dead skin cells from the surface of your skin, leaving it clean. Its ingredients provide nourishment and refreshment, stimulating blood flow and encouraging the natural lymphatic drainage. The skin becomes silky and sufficiently nourished, so there is no need for putting on body lotion after taking a shower. Since the main ingredient is fine sea salt, it is excellent for men since it easily dissolves in water on all skin areas.

Breathing at your lungs’ full capacity in a natural environment also affects the release of the happiness hormone, thus awakening the feeling of unity with nature.

Foot Reflexology
June – September

“The feet – the basis of health and success”

Reflexology is one of the most efficient traditional approaches to our health that is still used today because it is applied to the feet, which are in direct contact with the Earth.

By treating the zones in the feet, we indirectly affect the organs and tissues in our body that are connected and in this way aid the body to obtain balance, which enables us to better deal with various health issues. Foot reflexology balances the body and returns it to homeostasis, strengthens the immune system, as well as the system that extracts harmful substances from our body, and stimulates circulation. Reflexology helps in lowering tension and the effects of stress on the mind and body and also helps in terms of physical and emotional changes before and during menopause.

www.camps-cres-losinj.com

Solar Yoga
June – September

Without sunlight, there is no life. Each movement of every organism occurs due to the Sun. Solar yoga is performed in such a manner that you stand upright, barefoot, and look into the sun during the “safe hour.” The safe hour is 1 hour after sunrise or 1 hour before sunrise when the UV factor is between 0 and 2 and it isn’t harmful to the eyes. You stand barefoot on a stone or concrete surface. After a 15-minute cycle, solar yoga relieves mental stress and depression, improves memory and concentration, maintains positive thinking, relieves of bad habits and contributes to the art of living in the moment.

www.camps-cres-losinj.com

Aqua Aerobics
June – September

Do you enjoy exercises in the water so much that you would like to shape your body in this manner? Aqua aerobics is a form of group exercise with many positive effects. It is important that, because of the water exercises, which are soothing for the body, both young and old people can partake, no matter if you are in shape or merely a beginner, since it enables individual adaptations of exercise intensity.

Aqua aerobics affects the improvement and maintenance of stamina, strength, coordination and balance.

THE ISLAND OF LOSINJ – THE IDEAL NATURAL MEDICINE FOR TIRED LUNGS

VITALITY HOTEL PUNTA****, Veli Lošinj

LUNG REHABILITATION PROGRAMME – FOR ADULTS AND CHILDREN

(Off-season)

Lung rehabilitation programme is based on scientifically proven clinical and diagnostic methods combined with natural healing factors, the Lošinj aerosol, and the island’s hundred-year-old spa tradition. The optimal treatment period is three weeks. The multidisciplinary team is led by mr.sc. Anamarija Margan – Sulc dr.med., specialist in internal medicine who is in charge of the adult programmes, and mr.sc. Tatjana Funaric dr.med., paediatrician, in charge of children’s programmes. The team also includes nurses, nutritionists, psychologists, and trained therapists (kinesiologists, work therapists, and physiotherapists) who will support the patients and motivate them during the programme at the top quality and comfortable venues of the Vitality Hotel Punta.

Body Talk is designed for those who actively invest in their body; and equally for those who want to discover their physical capabilities and acquire healthy habits. Do not miss the opportunity and familiarize yourself with unique body techniques that will provide you with tools for better quality of life.

www.losinj-hotels.com

SPAR & RELAX – a zone that creates harmony between beneficial health factors of the sea water and surravys. Relax on our sundecks and breathe in the sea aerosol and the scented air of the island of Lošinj. The benefits of the sea water, indoor and external swimming pool, hot whirlpool, and different underwater attractions will help your body forget about stress and tension. Underwater aerobic programmes delivered by our trainers will help you discover your synergy with nature and make you feel vital.

• Aqua Body Gym is a free programme of morning gym for all ages that revitalises your body and lifts up the spirits.
• Individual exercise programmes, a relaxing water treatment with a personal trainer, will encourage your blood and immune systems and improve your health by reducing tension.
• Group exercises in the swimming pool will activate all your muscles, increase your stamina, strength and coordination, and result in better joint flexibility.

Sightseeing, souvenir workshops, and special programmes will help your body forget about stress and tension. Inhale a breath of fresh air, revitalize body and mind, and fill yourself with pure energy of scented Lošinj’s nature; through specially designed Green Energy programme with body technique and aromatherapy elements. Manipulative stretching instantly brings back the energy and clears the mind.

ACQUA FIT

March – October

Relax your muscles, stretch your spine and accelerate circulation! Aqua Fit programme stimulates your body in a secure medium – water – and does not let everyday “office sitting” affect your health.

Water is the source of life - the safest way to recreate a sense of physical and mental balance and to impact your health.

March – October

With specially designed active and passive exercises that are performed in a warm pool or sea, you can relax spasms in muscles and joints, stimulate circulation and correct bad posture. After this treatment you will feel reborn!

www.losinj-hotels.com

GREEN ENERGY

March – October

Green Energy Program is recommended to those who live a busy and stressful life in a polluted urban environment, and therefore feel exhausted and weak, which could develop into a chronic fatigue. This program allows the energy of the unspoiled Lošinj’s nature to fulfill your body and make the stress of everyday life disappear.

Inhale a breath of fresh air, revitalize body and mind, and fill yourself with pure energy of scented Lošinj’s nature; through specially designed Green Energy program with body technique and aromatherapy elements. Anti-gravity breathing exercises contribute to the psycho-physical revitalisation of the organism.

Targeted walks by the sea activate all muscle groups.

FAMILY HOTEL VESPERA****, Mali Lošinj

A HEALTHY AND FUN WEEK WITH PINO

April – October

Children! Bring your parents, grandfathers, grandparents and friends!
The nature of fragrances awakens in all its colours, while the light breeze mixes the scents of aromatic and medicinal herbs with the aerosols of the crystal clear sea. In such an environment positive health results are visible after only a few days. The unique nature of Losinj is a true ally to parents and children who have respiratory illnesses – asthma, bronchitis, laryngitis and various allergies. Nature also acts in a therapeutic manner on the improvement of appetite, better sleep, strengthens the immune system and gets rid of dermatological problems.

Spend a morning and an afternoon in a light stroll or play along the sea. You’ll most likely see one of Pino’s 150 friends playing happily as well.

They are good-natured dolphins that live in the sea around the island. And don’t forget to breathe deeply – the natural wellness of Losinj will cleanse you on the inside and ensure positive energy! For the brave ones out there – you can always wash your face in the refreshing sea and blow out your nose.

**LYMPHATIC DRAINAGE**

complemented with a footbath and natural lymphocytes.
The lymphatic drainage starts with a warm essential oil bath for the feet that is made up of sea salt and the essential oils of lavender and eucalyptus, which are considered natural lymph node accelerators. Our feet are copies of our body and everything we do to our feet indirectly affects our entire body. Manual lymphatic drainage follows, which brings balance to the fluids in our body. It is great for people who retain water in certain parts of the body and helps with detoxification.

**VITALITY PROGRAMMES AT HOTEL PUNTA VITALITY ZONE**

Vitality programmes were created in cooperation with leading experts in kinesiology of the PBS Centre of Sports Excellence and their patented programme body technique. The Centre also offers specially created exercises of body technique that amount to over 3,000 different exercises.

**Therapeutic exercises** with elements of classic pilates, gym, aqua-aerobic, dance, and yoga will help you achieve optimum movement of your body and the results will be visible after the first hour of exercising. If you’re attending as a couple, we offer a semi-individual one hour lesson under trainer’s supervision. Suitable for all ages.

**Water manipulation treatment** - with specially created active and passive exercises that you perform in a warm swimming pool or in the sea, this treatment will help you relieve the muscle and joint tension, encourage blood circulation, and correct bad posture.

**Water and body technique** are an ideal combination for gaining physical strength. Deep and shallow water are an excellent medium for therapeutic exercises with an additional hydro massage effect for the entire body. The result is increasing your physical fitness, but also learning new techniques for all people who enjoy the water, however, not swimming.

**Anti-gravitational stretching exercises** are a unique experience to understand your body and stimulate the blood flow. On a prop hanging from a ceiling, while swinging and hanging, we will present you with new methods of relaxation, as well as stretching, strengthening, and manipulation. This is an excellent exercise for a light stretch for the spine and lymphatic drainage.

Anti-gravitational breathing exercises will contribute to psycho-physical revitalisation of your organism. The exercises are performed on a specially created prop that additionally intensifies different moves such as those for relaxation, stretching, strengthening, and manipulation because it enables swinging and inverse positions.

**Manipulative stretch outdoors** instantly brings back the energy and clears your mind. Using a warm rock as a prop or leaning against the trunk of a scented pine-tree, your body technique trainer will demonstrate methods of passive body stretch in different positions.

**Targeted walks by the sea** will help you relieve stress in the beautiful surroundings of the island of Lošinj. Besides waking up all muscular groups in a fun way, you will experience the natural beauties of the island and the charm of its coves, as well as breathe in the scents of indigenous plants. Perhaps you will meet bottlenose dolphins on your way that will say hello in their playful manner.

**Junior Fit** - a specially created body technique programme for children of the 21st century who are missing out on quality playtime.

**Body talk**, an intense programme intended for everyone who actively invests in their body and wants to learn about their physical abilities, as well as introduce healthy habits in their lives.

**Green Energy** programme is recommended for anyone living in a fast-paced and stressful world in a polluted city environment and feels exhausted and lethargic, which can easily develop into chronic fatigue.

**Aqua-Fit** programme of five dynamic and incredibly pleasant exercises in water and on land will make you feel recharged, relax your muscles, stretch out your spine, and get the blood circulating, while your body will notice visible and positive changes.

**VITALITY PUNTA**

Indulge in the top-notch revitalising treatment and active effect of pure essential oils from the island of Lošinj to increase your body’s level of vitality.

**VITALITY PUNTA MASSAGE**

**FOOT REFLEXOLOGY**

**REVISUALISING Facial Mask**

**MEDITERRANEAN MASSAGE** This holistic massage offers you an exceptional feeling of being in harmony with the nature. You will experience a variety of movements, from deep relaxation, followed by encouragement of the blood. **ISLAND OF LOŠINJ DREAM**

Specially created programme aimed to achieve body and spirit balance accompanied by the scents of the island of Lošinj.

**ESSENSA SEA SALT PEELING**

**LOŠINJ MASSAGE**

**ANTI-AGE FACIAL TREATMENT WITH IMMORTELLE**

**VITALITY ZONE**

A beauty studio Vitality zone concept is based on rituals and therapeutic massages under professional guidance of a senior therapist. It encourages the use of Croatian natural cosmetics Esensia Mediterranea, as well as ecological essential oils made of indigenous plants.

**MEDICAL MASSAGE** is complemented with natural pain killers: St. John’s Wort and peppermint. It reduces tension, stiffness and muscle pain, relieves spasms, and helps achieve relaxation of the muscular system, as well as prevent or eliminate myogelosis.

**LYMPHATIC DRAINAGE** is complemented with foot bath and natural lymphatics. The massage starts with a warm aroma therapeutic foot bath comprised of sea salt, and laurel and cedar essential oils, which are considered natural lymphatic stimulants. The feet are the reflection of our bodies and whatever we do to them indirectly affects the entire organism. The treatment continues with a manual lymphatic drainage that creates balance in body fluids.

**MANUAL LYMPHATIC DRAINAGE** is a medical treatment with several benefits such as better blood supply of the tissue and elimination of edema (swellings), as well as activating lymph flow through lymph paths, which are important for the collection and discharge of waste from the tissue.

**ISLAND OF LOŠINJ DREAM**

Specially created programme aimed to achieve body and spirit balance accompanied by the scents of the island of Lošinj.

**MEDITERRANEAN MASSAGE** This holistic massage offers you an exceptional feeling of being in harmony with the nature. You will experience a variety of movements, from deep relaxation, followed by encouragement of the blood.
VITALITY ZONE
AROMATHERAPY STUDIO AT THE HOTEL PUNTA
www.losinj-hotels.com

Delivered by leading experts in aromatherapy, Lošinj will offer Aromatherapy workshops that show you how to use medicinal plants in everyday life. This is an opportunity to gain some valuable knowledge on aromatherapy, learn about local plants, and practice relaxation.

- **ADRIATIC HERBAL TOUCH**
  - Warm massage prepared with essential oils, lavender and rosemary peel-off mask that nourishes, relaxes, regenerates, drains, and detoxes the skin.
  - “Mediterranean forest” massage oil – a special blend of pine-, lavender, and rosemary essential oils.

- **AROMA MEDITERRANEAN**
  - Aroma, phyto, and thalasso facial treatment rendered by a special massage technique, combined with essential oils, lavender and rosemary. Contains pine, lavender, and rosemary essential oils.

- **Aroma, phyto, thalasso**
  - Aroma, phyto, and thalasso facial treatments that nurture and improve your beauty and health. Individual programmes will be conducted under the supervision of leading experts, using cutting edge medical technology and the most recent products.
  - Find a programme for yourself:
    - **BRING BACK BALANCE IN YOUR BODY THROUGH DETOX PROGRAMME!**
      - July – December
      - Stress, life in the fast lane, and lack of physical activity can weaken the organism and cause problems such as fatigue, drowsiness, which can result in greater issues, for example early aging signs, depression, and many other different conditions. In an oasis such as this, a unique combination of nutrition, physical exercise, and wellness treatments will ensure a natural cleanse of the organism. During the programme you can consult a nutritionist, fitness trainer, wellness therapist, and a medical professional who will provide you with guidelines for a healthier lifestyle.
      - **PREVENTIVE INTERNIST PROGRAMME**
        - July – December
      - Preventive check-up should be conducted at least once a year to identify an illness or risk factors on time since they can lead to chronic conditions. It is especially important for people who are exposed to a lot of stress, which is contextual to many chronic and even malignant diseases of the 21st century.
      - **Weight loss programme** – a personalised multidisciplinary programme for a balanced lifestyle that ensures a gradual but continuous weight loss under medical supervision.
      - **Anti-stress programme** – this short anti-stress programme with support from the psychologist will help you adopt healthy lifestyle habits and master stress management techniques.
